QUESTIONS?

INTRODUCTION TO ICPs, COMFRAME ASSESSMENT METHODOLOGY AND IAIS GLOSSARY

Ryan Workman, Chair of the Supervisory Material Review Task Force

Introduction, Assessment Methodology, Glossary

Introduction to ICPs

- Changes to paragraphs 18 and 19 were designed to specifically explain the distinction of responsibilities between the head of a group and individual legal entities in a group governance context
- Some further minor changes made for consistency

ComFrame Assessment Methodology

- The purpose of the methodology is to explain how the IAIS intends for its supervisory material to be used and assessed, and describes some considerations additional to the ICP Assessment Methodology that should be taken into account when assessing observance of ComFrame requirements
- Some further minor changes made for clarity

IAIS Glossary

- Scope of public consultation
- A complete and updated set of IAIS Glossary is now available on the [IAIS website](#)

QUESTIONS?

ICP 7

Anna Jernova, Chair of the Governance Working Group

Revisions to ICP 7

- Limited scope of revisions, related to ComFrame development, released for public consultation: ICP 7.0.7, 7.0.8 and 7.1.3
- The outcome of the public consultation – few and minor comments, which led to some further revisions
 - ICP 7.0.8 – change aimed at reflecting the existence of different models of governance in terms of the level of (de)centralisation
 - ICP 7.1.3 – change aimed at recognising that there might be conflicts of interests that cannot be avoided, and such conflicts should be managed
 - ICP 7.0.7 – the reference to ‘clear reporting lines’ kept. Clear reporting lines should be part of the group-wide corporate governance framework regardless of the corporate governance model adopted in a particular group

QUESTIONS?

APPLICATION PAPER ON RECOVERY PLANNING

Alex Hart, Chair of the Resolution Working Group

Introduction

- In November 2018 the draft Application Paper on Recovery Planning was released for public consultation
- On 13 November 2019, IAIS ExCo adopted the [revised Application Paper](#)
- The paper provides guidance to supervisory material related to recovery planning in ICP 16.15 and ComFrame integrated therein. It addresses:
 - Objectives and concepts of recovery planning
 - Requirements for recovery plans, and the application of the proportionality principle to recovery planning
 - Governance-related matters in recovery planning, including the development and approval process of a recovery plan and how it relates to overall ERM of an insurer
 - Key elements of a recovery plan, and examples of how these can be addressed in a recovery plan
 - The role of the supervisor

Outcome of the public consultation

Nature of Application Papers:

- Application Papers do not establish new standards / requirements. This paper provides guidance to supervisors when considering whether to implement recovery planning in their jurisdiction, and if so, how such recovery planning could be constructed.

Main comments received during public consultation:

- Relationship with other ERM-tools, including ORSA and contingency funding plans
- Possibility for other involved supervisors to require a separate recovery plan
- Preemptive nature of recovery planning
- Clarity around “activation” and “implementation” of the plan and the role of triggers and recovery options
- The need to include an overview of legal entities and critical functions
